Acme Technologies Pvt. Ltd.

Annual Report & Handbook 2025

Cover image: Bengaluru skyline at dusk (synthetic image for testing)

A 50-page sample document for testing Retrieval-Augmented Generation pipelines. It mixes text, tables, charts, diagrams, photographs, code blocks, two-column layouts and scanned pages. All data is fictional.

1. Company Overview

Acme Technologies was founded in 2015 in Bengaluru, Karnataka, India by Priya Sharma and Rahul Verma. The company builds AI-powered enterprise software focused on conversational assistants, document intelligence and workflow automation. As of December 2025, Acme employs 412 people across four offices: Bengaluru (headquarters), Pune, Hyderabad and Singapore.

1.1 Mission and Values

Our platform ingests documents from many sources, normalises them and makes the content searchable by meaning rather than keywords. Sustainability initiatives include a 40 percent reduction in cloud compute emissions through scheduled batch workloads.

- **Customer First** - every decision starts with customer impact.
- **Engineering Excellence** - we ship reliable, tested software.
- **Transparency** - open communication across all levels.
- **Ownership** - teams are accountable for outcomes, not just tasks.

1.2 Milestones

Year	Milestone	Impact
2015	Company founded with 5 employees	Seed funding of USD 0.5 million
2018	Launched AcmeBot 1.0	First 10 customers
2021	Series B funding of USD 25 million	Expansion to Singapore
2024	Released RAG Knowledge Assistant	60 percent faster support resolution
2025	Crossed 150 enterprise customers	Revenue of INR 1,945 lakhs

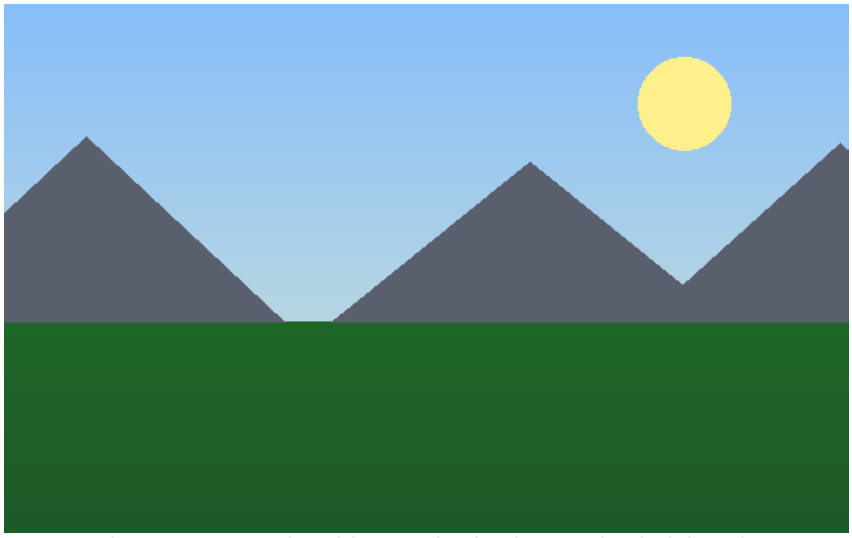

Figure 1.1: Campus view of the Bengaluru headquarters (synthetic image).

1.3 Leadership Team

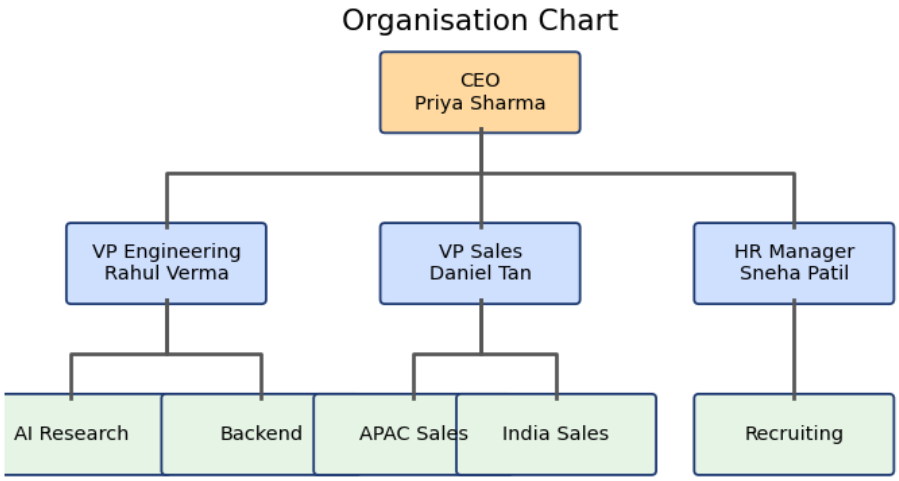

Figure 1.2: Organisation chart of the leadership team.

Quality is measured through retrieval precision, answer faithfulness and user satisfaction, tracked weekly on a shared dashboard. The engineering team follows trunk-based development with mandatory code review and automated testing before every release. Customers in banking, healthcare and logistics use the assistant to answer internal questions in seconds instead of hours.

2. Financial Summary

All figures are in INR Lakhs unless stated otherwise. Fiscal year 2025 closed with total revenue of 1,945 lakhs and a net profit of 524 lakhs.

Quarter	Revenue	Expenses	Net Profit	Growth (YoY)
Q1 FY25	405	310	95	12.5%
Q2 FY25	468	342	126	15.8%
Q3 FY25	512	371	141	18.2%
Q4 FY25	560	398	162	21.0%
Total	**1,945**	**1,421**	**524**	**16.9%**

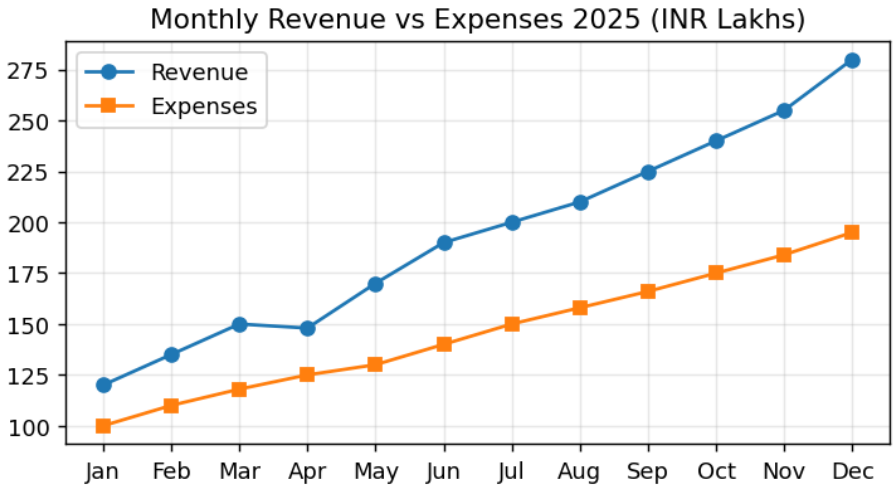

Figure 2.1: Monthly revenue versus expenses for 2025.

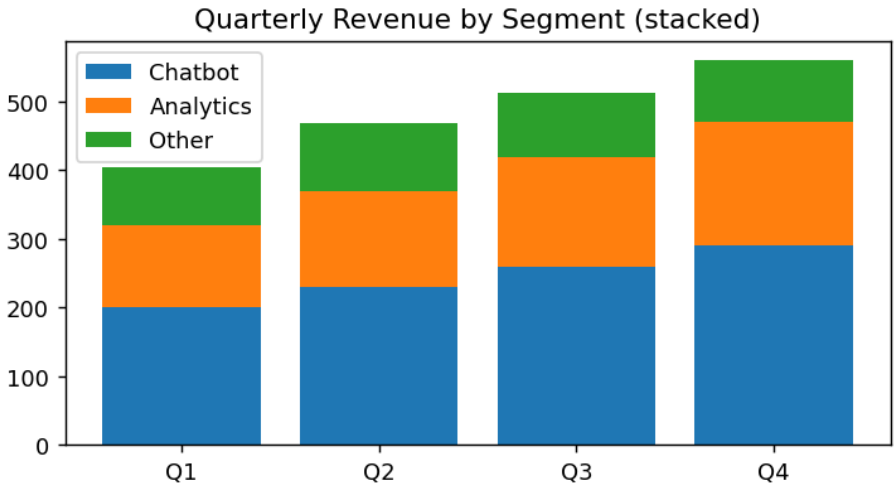

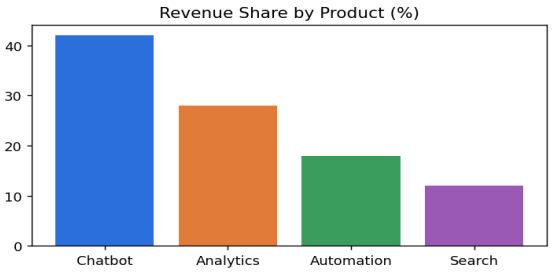

Figure 2.2: Quarterly revenue by segment.

2.1 Revenue by Product and Region

Product	Region	H1 Revenue	H2 Revenue	Total
Chatbot	India	310	380	690
	APAC	120	165	285
Analytics	India	210	240	450
	APAC	85	110	195
Automation	India	140	175	315
	APAC	60	80	140
Search	India	70	90	160
	APAC	25	40	65

Revenue by Region 2025

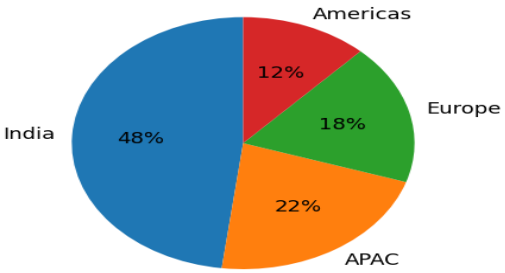

Figure 2.3 (left): Revenue share by product. Figure 2.4 (right): Revenue by region - India contributes 48 percent.

2.2 Key Ratios

Metric	FY2024	FY2025	Change
Gross margin	61.2%	64.8%	+3.6 pts
Operating margin	22.0%	26.9%	+4.9 pts
Customer acquisition cost (INR)	92,000	78,500	-14.7%
Average contract value (INR lakhs)	9.4	12.9	+37.2%
Net revenue retention	108%	117%	+9 pts
Employee attrition	16.1%	11.8%	-4.3 pts

Security reviews are performed every quarter, and all customer data is encrypted at rest and in transit using industry standards. The engineering team follows trunk-based development with mandatory code review and automated testing before every release. Our platform ingests documents from many sources, normalises them and makes the content searchable by meaning rather than keywords.

[Section 3 employee directory (original p.8-12, ~150 rows: ID, name, department, role, location, joined, rating) removed to save space. Headcount and hiring tables below are kept.]

3.1 Headcount by Department and Location

Department	Bengaluru	Pune	Hyderabad	Singapore	Total
Engineering	120	45	30	5	200
AI Research	25	0	18	2	45
Sales & Marketing	30	10	8	22	70
Operations	35	12	10	8	65
HR & Admin	18	6	4	4	32
Total	228	73	70	41	412

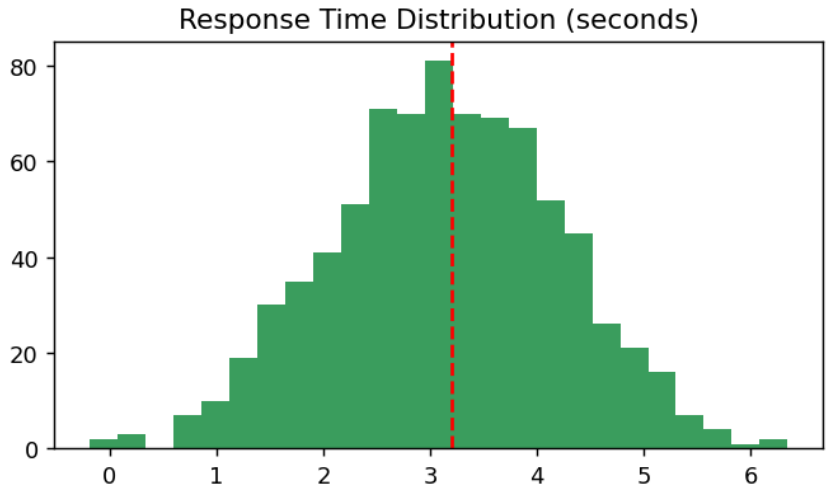

Figure 3.1: Distribution of internal helpdesk response times.

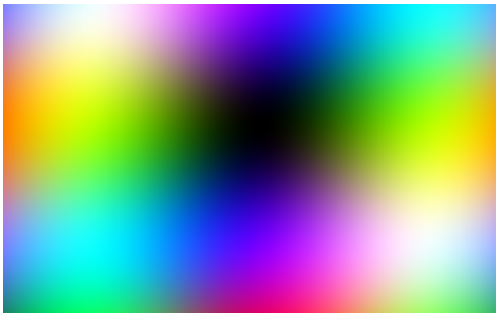

3.2 Hiring Plan 2026

Team	Open Roles	Priority	Target Quarter
Backend Engineering	14	High	Q1
ML / AI	9	High	Q1
Customer Success	6	Medium	Q2
Design	3	Low	Q3

4. Products

Acme sells four product lines. Each has its own datasheet below with a representative screenshot (synthetic).

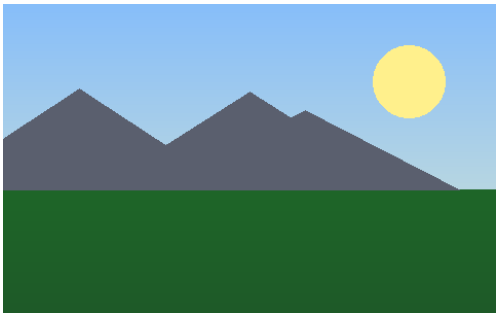

4.1 AcmeBot Chatbot Platform

Feature	Detail
Channels	Web, WhatsApp, Slack, Teams
Languages	22 including Hindi, Kannada, Tamil
Pricing	INR 45,000 per month base
SLA	99.9 percent uptime

Quality is measured through retrieval precision, answer faithfulness and user satisfaction, tracked weekly on a shared dashboard. Sustainability initiatives include a 40 percent reduction in cloud compute emissions through scheduled batch workloads.

4.2 Acme Analytics

Feature	Detail
Dashboards	Unlimited custom dashboards
Data sources	40+ connectors
Pricing	INR 30,000 per month base
SLA	99.5 percent uptime

Quality is measured through retrieval precision, answer faithfulness and user satisfaction, tracked weekly on a shared dashboard. Customers in banking, healthcare and logistics use the assistant to answer internal questions in seconds instead of hours.

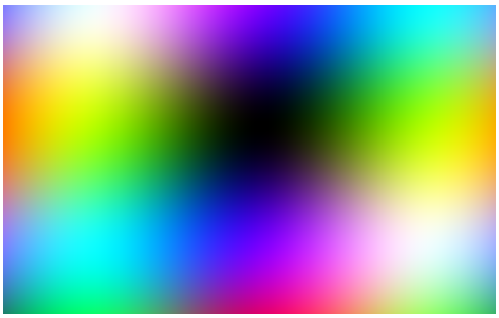

4.3 Acme Automate

Feature	Detail
Workflows	Visual drag-and-drop builder
Integrations	SAP, Salesforce, Zoho
Pricing	INR 60,000 per month base
SLA	99.9 percent uptime

Security reviews are performed every quarter, and all customer data is encrypted at rest and in transit using industry standards. The engineering team follows trunk-based development with mandatory code review and automated testing before every release.

4.4 Acme Search

Feature	Detail
Index size	Up to 50 million documents
Retrieval	Hybrid keyword + vector
Pricing	INR 25,000 per month base
SLA	99.5 percent uptime

Quality is measured through retrieval precision, answer faithfulness and user satisfaction, tracked weekly on a shared dashboard. The engineering team follows trunk-based development with mandatory code review and automated testing before every release.

4.5 Product Comparison Matrix

Capability	AcmeBot	Analytics	Automate	Search
Natural language interface	Yes	Yes	Partial	Yes
Multilingual	Yes	No	No	Yes
On-premise option	Yes	Yes	Yes	No
REST API	Yes	Yes	Yes	Yes
SSO / SAML	Yes	Yes	Yes	Yes
Offline mode	No	No	Yes	No
Audit logs	Yes	Yes	Yes	Partial

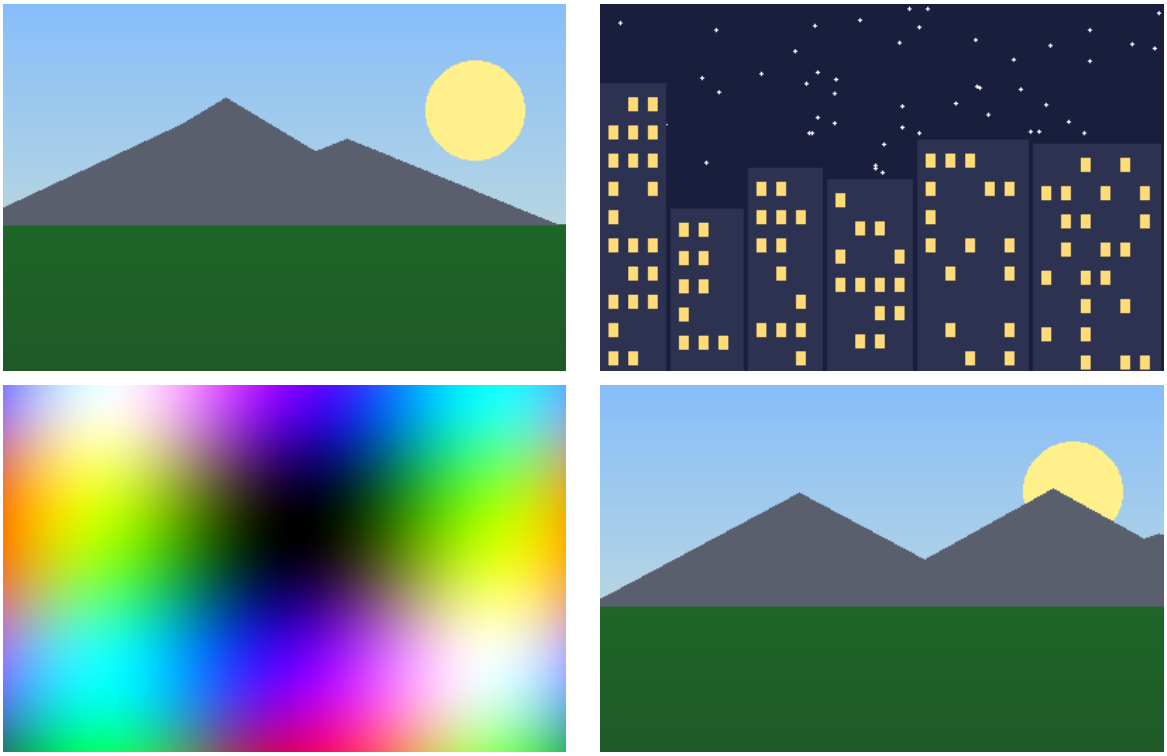

Figure 4.1: Customer event gallery - (top-left) Pune summit, (top-right) Singapore launch night, (bottom-left) hackathon demo wall, (bottom-right) Hyderabad offsite.

5. Technical Architecture

The Knowledge Assistant follows a Retrieval-Augmented Generation design with five stages.

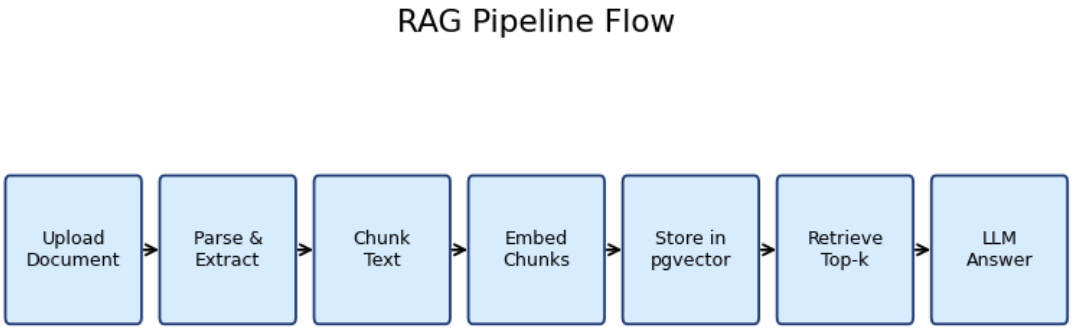

Figure 5.1: End-to-end RAG pipeline.

Stage	Component	Technology	Description
1. Ingestion	Document Loader	PyMuPDF, python-docx, pandas	Reads PDF, Word, Excel and CSV files and extracts text and tables.
2. Chunking	Text Splitter	RecursiveCharacterTextSplitter	Splits content into 500-token chunks with 50-token overlap.
3. Embedding	Embedding Model	text-embedding-3-small	Converts each chunk into a 1536-dimension vector.
4. Storage	Vector DB	PostgreSQL + pgvector	Stores vectors with metadata for similarity search.
5. Generation	LLM + API	FastAPI + Claude	Retrieves top-k chunks and generates a grounded answer.

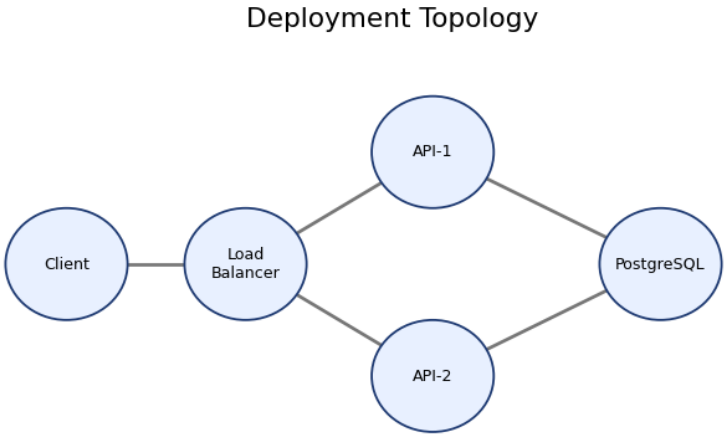

Figure 5.2: Production deployment topology.

5.1 Database Schema

```
CREATE EXTENSION IF NOT EXISTS vector;

CREATE TABLE documents (
    id          SERIAL PRIMARY KEY,
    filename    VARCHAR(255) NOT NULL,
    file_type   VARCHAR(20),
    uploaded_by INT REFERENCES users(id),
    uploaded_at TIMESTAMP DEFAULT NOW()
);

CREATE TABLE chunks (
    id          SERIAL PRIMARY KEY,
    document_id INT REFERENCES documents(id) ON DELETE CASCADE,
    page_number INT,
    chunk_index INT,
    content     TEXT NOT NULL,
    embedding   VECTOR(1536)
);

CREATE INDEX idx_chunks_embedding ON chunks
    USING ivfflat (embedding vector_cosine_ops) WITH (lists = 100);
```

5.2 Chunking Example (Python)

```
from langchain.text_splitter import RecursiveCharacterTextSplitter

splitter = RecursiveCharacterTextSplitter(
    chunk_size=500,
    chunk_overlap=50,
    separators=["\n\n", "\n", ". ", " "],
)

def chunk_document(pages):
    chunks = []
    for page_no, text in enumerate(pages, start=1):
        for i, piece in enumerate(splitter.split_text(text)):
            chunks.append({"page": page_no, "index": i, "content": piece})
    return chunks
```

5.3 Infrastructure Sizing

Component	Instance Type	vCPU	RAM (GB)	Count	Monthly Cost (USD)
API server	c6i.xlarge	4	8	3	372
Worker	c6i.2xlarge	8	16	2	496
PostgreSQL	r6g.xlarge	4	32	2	590
Redis cache	cache.m6g.large	2	6	1	112
Load balancer	ALB	-	-	1	45

6. API Reference

Base URL: `https://api.acme-example.com/v1`. All endpoints require a bearer token except /health.

Method	Endpoint	Description	Auth	Rate Limit
POST	/documents/upload	Upload a file for ingestion	Bearer	10/min
GET	/documents	List all documents	Bearer	60/min
GET	/documents/{id}	Get one document's metadata	Bearer	60/min
DELETE	/documents/{id}	Delete a document and its chunks	Admin	5/min
POST	/ask	Ask a question	Bearer	30/min
GET	/health	Service health check	None	120/min

6.1 Example Request

```
POST /v1/ask
Authorization: Bearer <token>
Content-Type: application/json

{
  "question": "What was the net profit in Q3 FY25?",
  "top_k": 4,
  "filters": {"file_type": "pdf"}
}
```

6.2 Example Response

```
{
  "answer": "The net profit in Q3 FY25 was 141 lakhs INR.",
  "sources": [{"document": "annual_report_2025.pdf", "page": 2, "score": 0.91}],
  "latency_ms": 840
}
```

6.3 FastAPI Implementation

```
from fastapi import FastAPI, UploadFile, Depends, HTTPException
from sqlalchemy.orm import Session

app = FastAPI(title="Acme Knowledge Assistant")

@app.post("/v1/documents/upload", status_code=201)
async def upload(file: UploadFile, db: Session = Depends(get_db)):
    if file.size > 25 * 1024 * 1024:
        raise HTTPException(status_code=413, detail="File too large")
    doc = Document(filename=file.filename, file_type=file.content_type)
    db.add(doc); db.commit()
    await ingest_file(doc.id, await file.read())
    return {"id": doc.id, "status": "ingested"}
```

6.4 Error Codes

Code	Meaning	Suggested Action
400	Bad request / invalid JSON	Check request body format
401	Missing or invalid token	Re-authenticate
404	Document not found	Verify the document ID
413	File too large (max 25 MB)	Split or compress the file
429	Rate limit exceeded	Retry after 60 seconds
500	Internal server error	Contact support

7. Operations & Facilities

The Bengaluru headquarters occupies floors 3 to 5 of a leased building in Whitefield. Floor 3 hosts the main engineering teams and the server room.

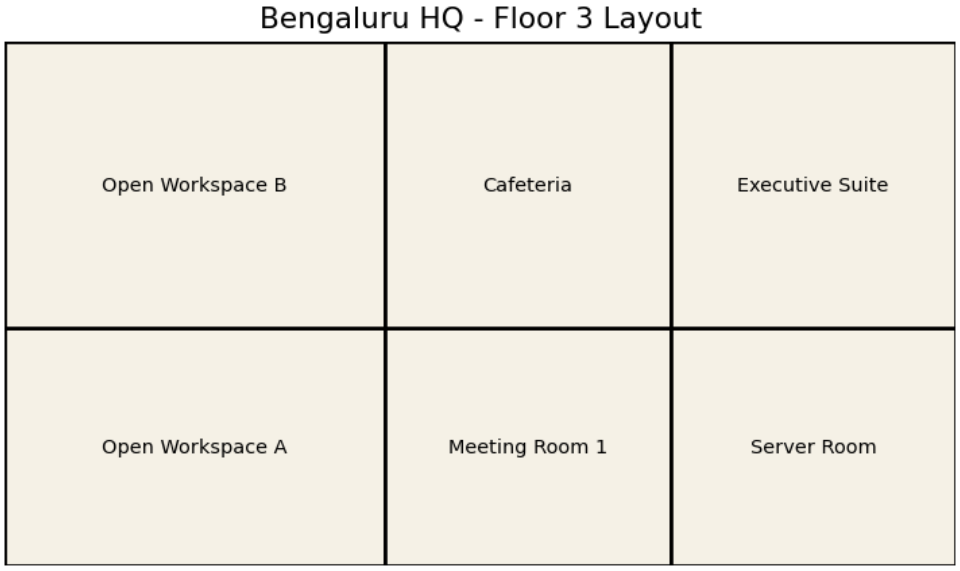

Figure 7.1: Floor 3 layout of the Bengaluru headquarters.

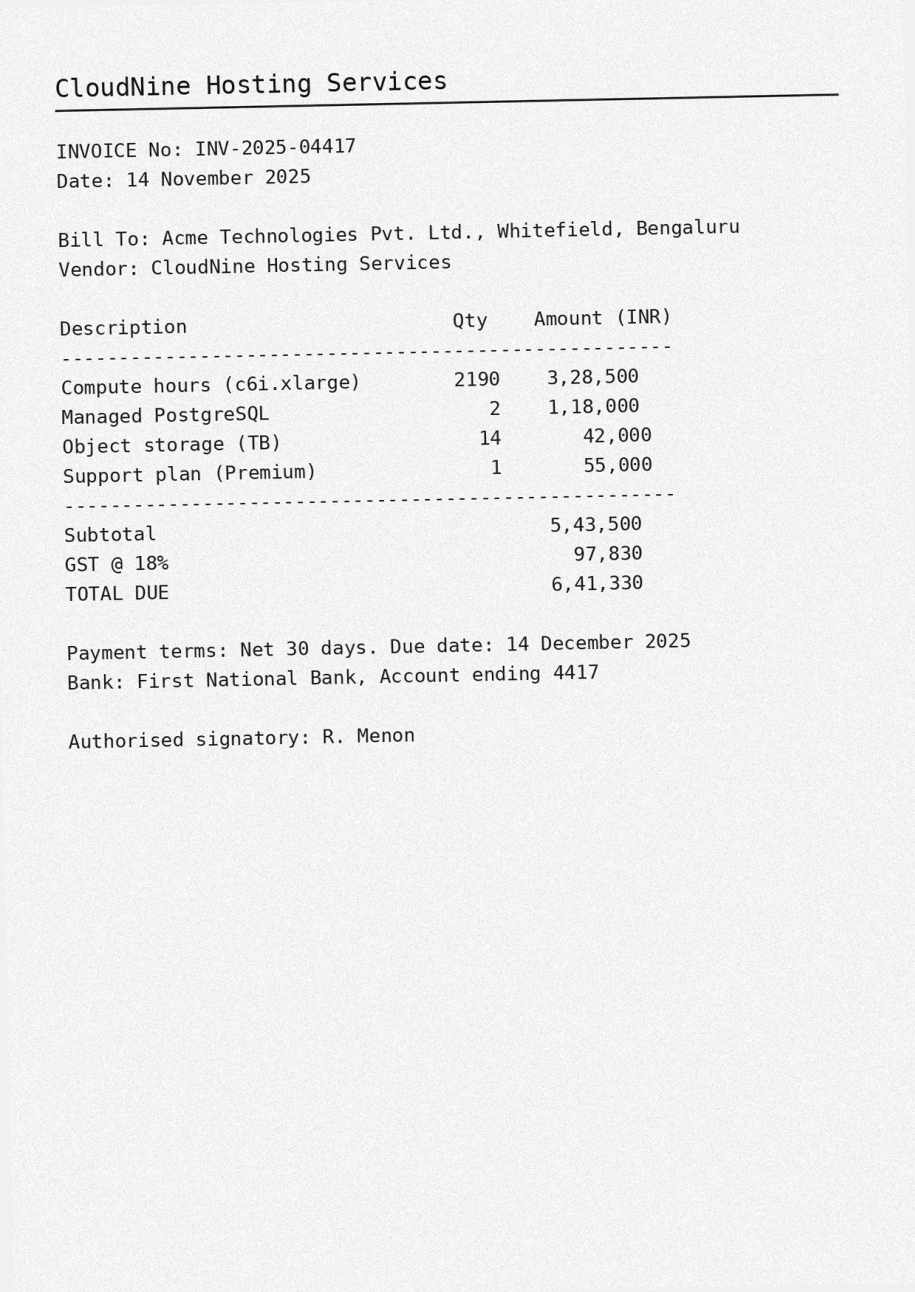

Office	City	Area (sq ft)	Seats	Lease Expiry	Monthly Rent (INR)
HQ	Bengaluru	52,000	380	2029-03-31	41,60,000
Pune Hub	Pune	14,500	110	2027-08-31	8,70,000
Hyderabad Hub	Hyderabad	12,000	90	2028-01-31	7,20,000
Singapore	Singapore	4,200	35	2026-12-31	SGD 18,500

7.1 Vendor Contract Summary

Vendor	Service	Annual Value (INR lakhs)	Renewal Date	Owner
CloudNine Hosting	Cloud infrastructure	312	2026-04-01	Rahul Verma
SecureNet	Cybersecurity audit	48	2026-06-15	Sneha Patil
FoodCo Catering	Cafeteria services	36	2026-01-01	Sneha Patil
LegalEase LLP	Legal retainer	24	2026-09-30	Priya Sharma
TravelDesk	Corporate travel	60	2026-03-01	Daniel Tan

7.2 Scanned Document - Vendor Invoice (image only, OCR required)

The page below is a rasterised scan. Its text exists only as pixels, so a text extractor returns nothing and an OCR step is needed.

CloudNine Hosting Services

INVOICE No: INV-2025-04417
Date: 14 November 2025

Bill To: Acme Technologies Pvt. Ltd., Whitefield, Bengaluru
Vendor: CloudNine Hosting Services

Description	Qty	Amount (INR)
Compute hours (c6i.xlarge)	2190	3,28,500

8. Market Research

The following pages use a two-column layout, as found in many research papers and newsletters. Readers must follow column order, not simply left-to-right lines.

8.1 Market Size

The Indian enterprise AI market was valued at USD 3.1 billion in 2025 and is projected to reach USD 9.8 billion by 2029, a compound annual growth rate of 33 percent.

Our platform ingests documents from many sources, normalises them and makes the content searchable by meaning rather than keywords. Quality is measured through retrieval precision, answer faithfulness and user satisfaction, tracked weekly on a shared dashboard. The engineering team follows trunk-based development with mandatory code review and automated testing before every release.

8.4 Pricing Trends

Average pricing for conversational AI platforms declined 9 percent year over year, driven by open-source model adoption and cloud competition.

Quality is measured through retrieval precision, answer faithfulness and user satisfaction, tracked weekly on a shared dashboard. The engineering team follows trunk-based development with mandatory code review and automated testing before every release. Customers in banking, healthcare and logistics use the assistant to answer internal questions in seconds instead of hours.

Security reviews are performed every quarter, and all customer data is encrypted at rest and in transit using industry standards. Our platform ingests documents from many sources, normalises them and makes the content searchable by meaning rather than keywords.

8.2 Competitor Landscape

Acme competes with three major players: GlobalAI Corp (market share 24 percent), NeuralWorks (17 percent) and ConvoTech (11 percent). Acme holds 8 percent.

Sustainability initiatives include a 40 percent reduction in cloud compute emissions through scheduled batch workloads. Security reviews are performed every quarter, and all customer data is encrypted at rest and in transit using industry standards. Customers in banking, healthcare and logistics use the assistant to answer internal questions in seconds instead of hours.

Security reviews are performed every quarter, and all customer data is encrypted at rest and in transit using industry standards. Quality is measured through retrieval precision, answer faithfulness and user satisfaction, tracked weekly on a shared dashboard.

8.3 Customer Segments

Banking and financial services account for 38 percent of Acme customers, followed by healthcare at 22 percent and logistics at 15 percent.

Sustainability initiatives include a 40 percent reduction in cloud compute emissions through scheduled batch workloads. Our platform ingests documents from many sources, normalises them and makes the content searchable by meaning rather than keywords. Customers in banking, healthcare and logistics use the assistant to answer internal questions in seconds instead of hours.

Quality is measured through retrieval precision, answer faithfulness and user satisfaction, tracked weekly on a shared dashboard. Our platform ingests documents from many sources, normalises them and makes the content searchable by meaning rather than keywords.

8.7 Technology Trends

Retrieval-augmented generation has become the default architecture for enterprise assistants, with hybrid search and re-ranking widely adopted.

The engineering team follows trunk-based development with mandatory code review and automated testing before every release. Quality is measured through retrieval precision, answer faithfulness and user satisfaction, tracked weekly on a shared dashboard. Customers in banking, healthcare and logistics use the assistant to answer internal questions in seconds instead of hours.

The engineering team follows trunk-based development with mandatory code review and automated testing before every release. Customers in banking, healthcare and logistics use the assistant to answer internal questions in seconds instead of hours.

8.8 Market Charts

Sustainability initiatives include a 40 percent reduction in cloud compute emissions through scheduled batch workloads. Our platform ingests documents from many sources, normalises them and makes the content searchable by meaning rather than keywords.

8.5 Regulatory Outlook

The Digital Personal Data Protection Act requires explicit consent and data localisation for certain categories of personal data, raising compliance costs.

Security reviews are performed every quarter, and all customer data is encrypted at rest and in transit using industry standards. Our platform ingests documents from many sources, normalises them and makes the content searchable by meaning rather than keywords. Customers in banking, healthcare and logistics use the assistant to answer internal questions in seconds instead of hours.

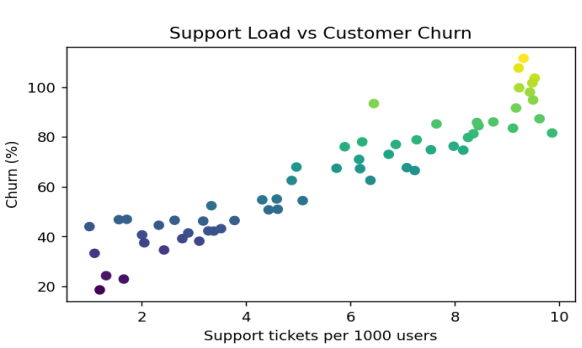

Security reviews are performed every quarter, and all customer data is encrypted at rest and in transit using industry standards. Customers in banking, healthcare and logistics use the assistant to answer internal questions in seconds instead of hours.

8.6 Talent Market

Demand for machine learning engineers exceeds supply by roughly 2.4 times in Bengaluru, pushing median salaries up 14 percent in 2025.

Quality is measured through retrieval precision, answer faithfulness and user satisfaction, tracked weekly on a shared dashboard. Customers in banking, healthcare and logistics use the assistant to answer internal questions in seconds instead of hours. Security reviews are performed every quarter, and all customer data is encrypted at rest and in transit using industry standards.

Sustainability initiatives include a 40 percent reduction in cloud compute emissions through scheduled batch workloads. Our platform ingests documents from many sources, normalises them and makes the content searchable by meaning rather than keywords.

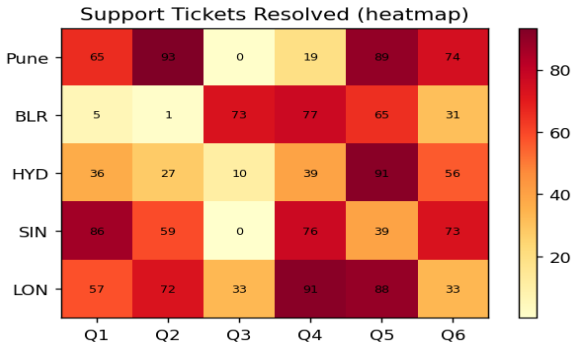

Figure 8.1 (left): Support load versus churn. Figure 8.2 (right): Tickets resolved by office and quarter.

Competitor	Market Share	Funding (USD M)	Employees	HQ
GlobalAI Corp	24%	410	3,200	San Francisco
NeuralWorks	17%	180	1,150	London
ConvoTech	11%	95	620	Tel Aviv
Acme Technologies	8%	32	412	Bengaluru

9. Policies & FAQ

9.1 Leave Policy

Leave Type	Days / Year	Carry Forward	Notice Required
Casual Leave	12	No	1 day
Sick Leave	10	Yes (max 5)	Same day
Earned Leave	18	Yes (max 30)	7 days
Maternity Leave	182	N/A	30 days
Paternity Leave	15	N/A	15 days
Bereavement Leave	5	No	Immediate

9.2 Expense Reimbursement Limits

Category	Limit per Claim (INR)	Approval Level	Receipt Required
Domestic travel	25,000	Manager	Yes
International travel	2,00,000	Department head	Yes
Client entertainment	10,000	Manager	Yes
Internet and phone	1,500 per month	Auto-approved	No
Training courses	50,000 per year	Department head	Yes

9.3 Frequently Asked Questions

Q: How many employees does Acme have?

A: Acme has 412 employees across Bengaluru, Pune, Hyderabad and Singapore as of December 2025.

Q: What is the work-from-home policy?

A: Employees may work from home up to 3 days per week with manager approval.

Q: How is the annual bonus calculated?

A: The bonus is 8 to 20 percent of base salary depending on the performance rating and company profitability.

Q: Who should I contact for IT support?

A: Email it-support@acme-example.com or call extension 4400 between 9 AM and 7 PM IST.

Q: What is the notice period for resignation?

A: The notice period is 60 days for all employees and 90 days for director-level roles.

Q: Does Acme provide health insurance?

A: Yes. Coverage of INR 5 lakhs per employee, extendable to spouse, children and parents.

9.4 Employee Leave Application Form

Field	Value
Employee ID	E078
Employee Name	Karthik Nair
Department	Engineering
Leave Type	Earned Leave
From	2025-12-22
To	2025-12-31
Total Days	8
Reason	Family function in Kochi
Manager Approval	[X] Approved [ ] Rejected
Approved By	Rahul Verma
HR Verified	[X] Yes [ ] No

IMPORTANT: Reimbursement claims must be submitted within 30 days of expense. Claims above INR 10,000 need approval from the department head. Late claims will be rejected without exception.

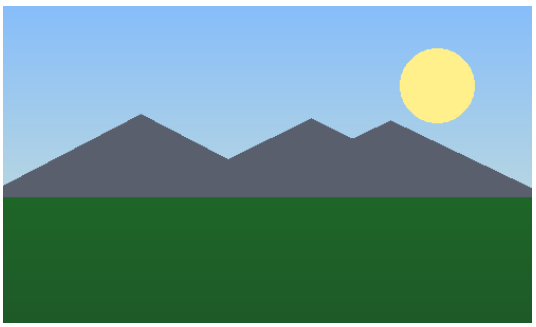

9.5 Code of Conduct Summary

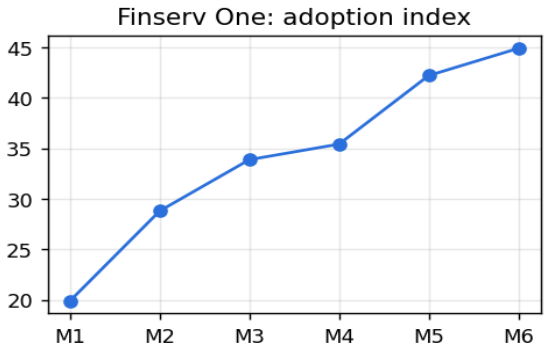

1. Treat colleagues, customers and partners with respect.
2. Disclose conflicts of interest to HR within 7 days.
3. Never share customer data outside approved systems.
4. Report security incidents to the security team within 1 hour.
5. Gifts above INR 5,000 must be declared and approved by the manager.

10. Customer Case Studies

Each case study below contains a photo, a results table, a chart and a narrative. Questions often need facts from several of these elements together.

10.1 Finserv One (Banking)

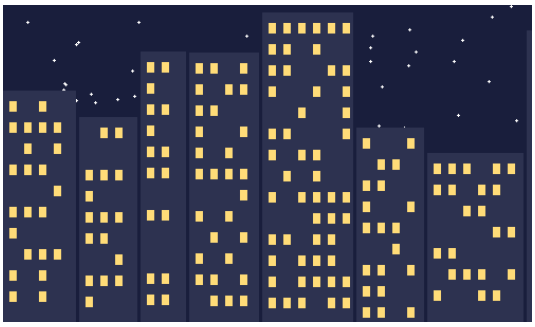

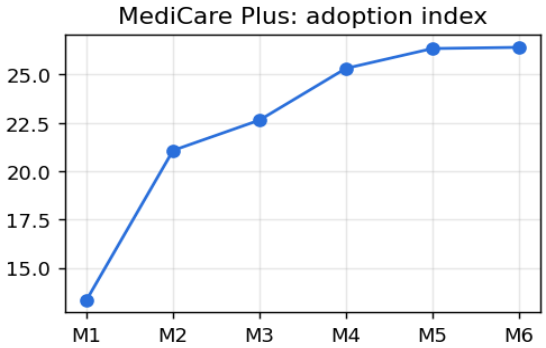

Result: Reduced average call handling time from 9.5 minutes to 4.1 minutes using AcmeBot.

Attribute	Value
Customer	Finserv One
Industry	Banking
Seats licensed	120
Go-live	2025-01-15
Primary product	AcmeBot
Contract term	12 months

Sustainability initiatives include a 40 percent reduction in cloud compute emissions through scheduled batch workloads. The engineering team follows trunk-based development with mandatory code review and automated testing before every release. Quality is measured through retrieval precision, answer faithfulness and user satisfaction, tracked weekly on a shared dashboard.

10.2 MediCare Plus (Healthcare)

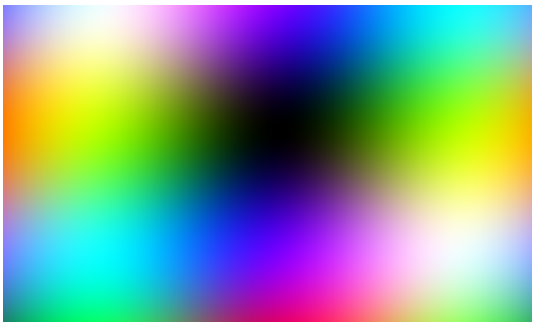

Result: Automated 62 percent of patient appointment queries across 9 hospitals.

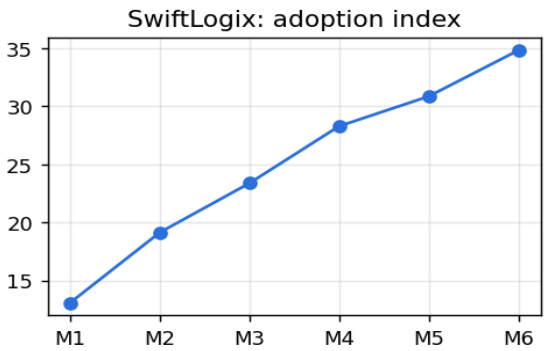

Attribute	Value
Customer	MediCare Plus
Industry	Healthcare

Contract term	24 months

Quality is measured through retrieval precision, answer faithfulness and user satisfaction, tracked weekly on a shared dashboard. The engineering team follows trunk-based development with mandatory code review and automated testing before every release. Customers in banking, healthcare and logistics use the assistant to answer internal questions in seconds instead of hours.

11. Quarterly Business Reviews

11.1 Q1 FY25 Review

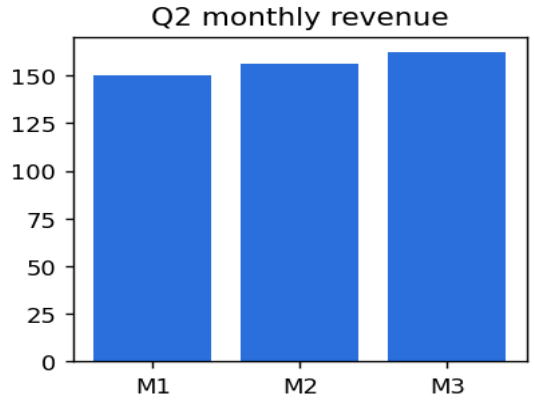

Highlight: Launch of multilingual AcmeBot in Kannada and Tamil. Revenue was 405 lakhs, expenses 310 lakhs and net profit 95 lakhs.

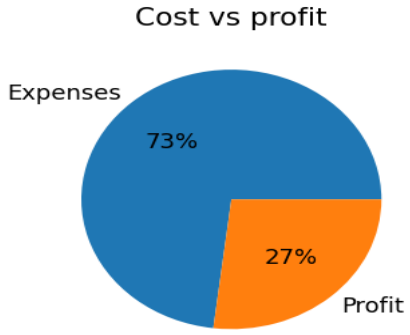

KPI	Target	Actual	Status
Revenue (lakhs)	395	405	Met
New customers	10	12	Met
NPS	48	50	Met
Uptime %	99.9	99.93	Met
Open P1 incidents	0	1	Missed

Risks and actions

- Our platform ingests documents from many sources, normalises them and makes the content searchable by meaning rather than keywords.
- Security reviews are performed every quarter, and all customer data is encrypted at rest and in transit using industry standards.

11.2 Q2 FY25 Review

Highlight: Opened the Hyderabad hub and hired 40 engineers. Revenue was 468 lakhs, expenses 342 lakhs and net profit 126 lakhs.

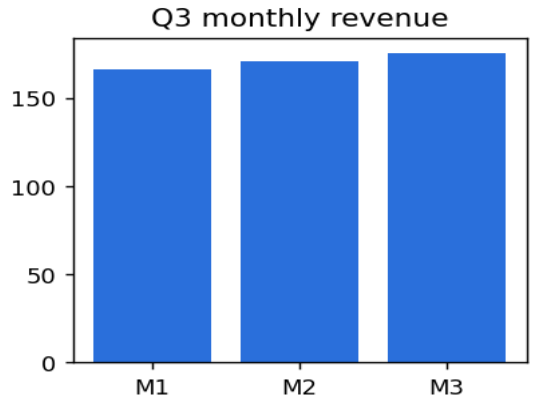

KPI	Target	Actual	Status
Revenue (lakhs)	458	468	Met
New customers	13	16	Met
NPS	49	52	Met
Uptime %	99.9	99.88	Missed
Open P1 incidents	0	2	Missed

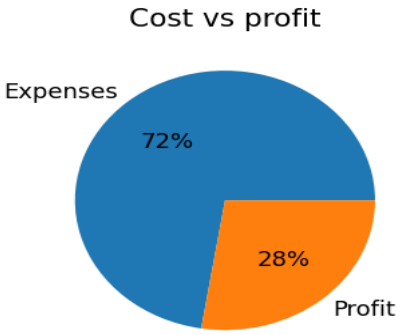

Risks and actions

- Customers in banking, healthcare and logistics use the assistant to answer internal questions in seconds instead of hours.

- Quality is measured through retrieval precision, answer faithfulness and user satisfaction, tracked weekly on a shared dashboard.

11.3 Q3 FY25 Review

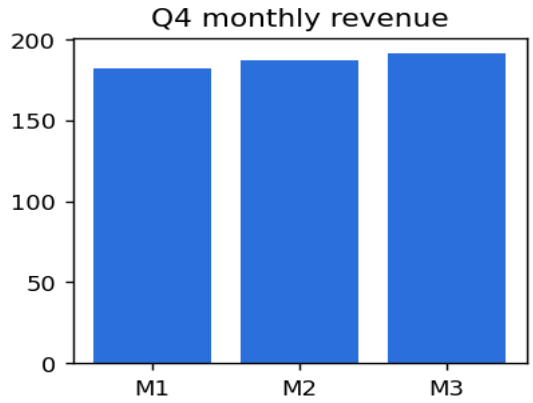

Highlight: Released the RAG Knowledge Assistant v2 with hybrid search. Revenue was 512 lakhs, expenses 371 lakhs and net profit 141 lakhs.

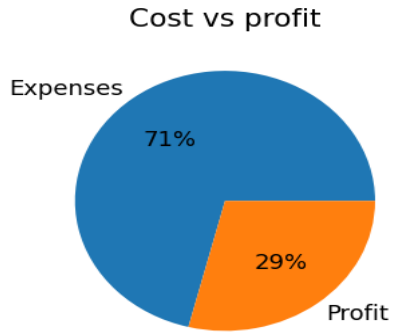

KPI	Target	Actual	Status
Revenue (lakhs)	502	512	Met
New customers	16	20	Met
NPS	50	54	Met
Uptime %	99.9	99.95	Met
Open P1 incidents	0	0	Met

Risks and actions

- Customers in banking, healthcare and logistics use the assistant to answer internal questions in seconds instead of hours.
- Our platform ingests documents from many sources, normalises them and makes the content searchable by meaning rather than keywords.

11.4 Q4 FY25 Review

Highlight: Signed 22 new enterprise customers including BankNova. Revenue was 560 lakhs, expenses 398 lakhs and net profit 162 lakhs.

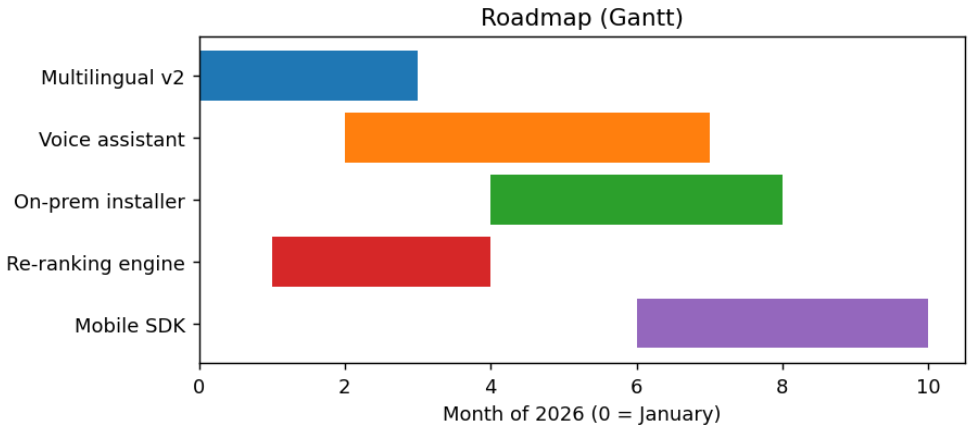

KPI	Target	Actual	Status
Revenue (lakhs)	550	560	Met
New customers	19	24	Met

KPI	Target	Actual	Status
NPS	51	56	Met
Uptime %	99.9	99.97	Met
Open P1 incidents	0	0	Met

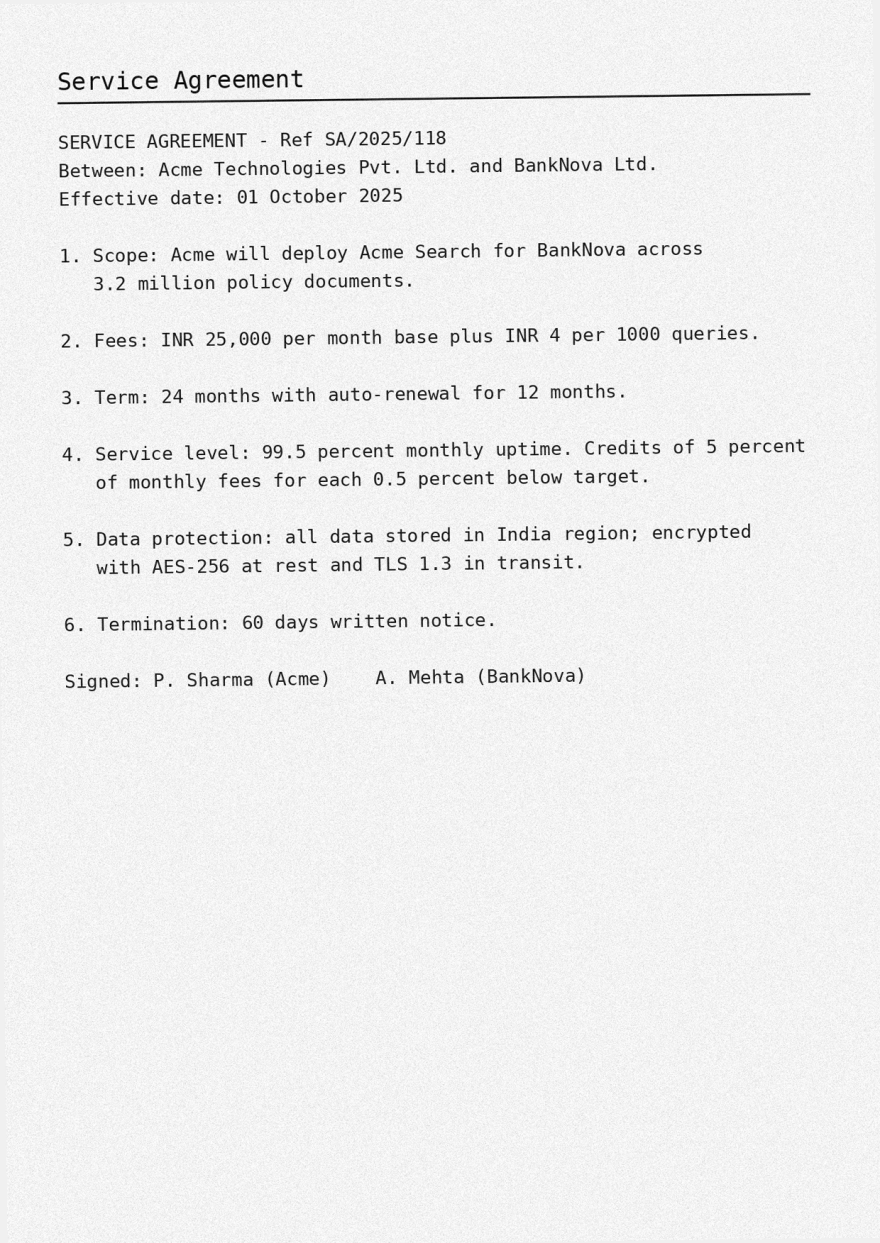

Risks and actions

- Sustainability initiatives include a 40 percent reduction in cloud compute emissions through scheduled batch workloads.
- The engineering team follows trunk-based development with mandatory code review and automated testing before every release.
